These are of course revised editions from his earlier book *The Poets: Chaucer to Tennyson Impressions* which is from 1907 or 1909 I believe. These two volumes were rather difficult for me to find, but I have a copy of both volumes in great condition, so I'm sure there are more out there somewhere. Stebbing has a keen understanding of the differences in poetry and poets alike. Just his introduction will illustrate that. 364 pages, colour frontispiece, profusely illustrated throughout in colour and black & white, brown cloth, a very good copy in the dust jacket. The English have come a long way from those precarious days of invasion and conquest, with many spectacular changes of fortune. Their political, economic and cultural contacts have left traces for good and ill across the world. This book describes their history and its meanings from their beginnings in the monasteries of Northumbria and the wetlands of Wessex to the cosmopolitan energy of today's England.Â This book, the first single-volume work on this scale for more than half a century, and which incorporates a wealth of recent scholarship, presents a challenging modern account of this immense and continuing story, bringing out the strength and resilience of English government, the deep patterns of division, and yet also the persistent capacity to come together in the face of danger.
