I. INTRODUCTION (20 items)

The works listed here constitute some of the most accessible, relevant or widest-ranging work on eighteenth-century Scottish culture – sometimes approached from a British or European perspective, sometimes from one which is insularly Scottish. It is likely that they will all have to be consulted quite regularly, and that you will become familiar with most of them.

Recommended reading (4 items)

These texts are perhaps the very best general studies or collections currently in print or available second-hand and so might be regarded as the items most likely to be worth buying yourself

SEMESTER 1

II. CONTEXT (41 items)

Week 1. Seventeenth-century inheritance: humanism, science and natural law (24 items)

This topic focuses on the culture and intellectual character of the later seventeenth century. Most commentators during the Scottish Enlightenment roundly dismissed their native predecessors. Posterity has usually followed suit. However, recent research has emphasised significant developments in literature, science and legal studies which may have proved surprisingly influential in shaping the eighteenth-century Enlightenment. We

will assess the merits of both standpoints.

Primary sources (4 items)

Week 2. Scottish conditions: a Revolution in a poor country (17 items)

Early eighteenth-century Scots were the beneficiaries of the Protestant, Williamite revolutions of 1688-90 across Britain. Many, however, also believed they lived in a backward country in urgent need of economic modernization. This gave rise to an obsessive concern for "Improvement" which underpinned the Enlightenment. We will

examine the consequences of the Revolution and try to assess Scotland's real material position in its immediate aftermath.

III. POLITICS AND RELIGION IN SCOTLAND (76 items)

Week 3. The Union debates and after: civic humanism and Improvement (20 items)

The parliamentary act of Union with England in 1707 has always been seen as singularly important in making possible the subsequent Enlightenment in Scotland. We will examine the extraordinary national debate about Scotland's political future, in which great significance attached to comparisons with the classical republics of antiquity and to the need to improve the country's position in the world.

Week 4. Kirk and university: toleration and the triumph of Moderatism (31 items)

Tradition asserts that the eighteenth-century Enlightenment across Europe was a comprehensive attack on organized religion and orthodox belief. Yet there are grounds for thinking that the Scottish experience was very different. The Kirk, the clergy and the universities played a crucial role both in promoting intellectual freedom and in producing

the great literary and philosophical works of the age. This topic explores the peculiar flavour that this gave both to Scottish religion and to the Enlightenment in Scotland.

Week 5. Hanoverian society: patriotism, patronage and corruption (25 items)

Eighteenth-century Scots had a deeply ambivalent identity- sometimes proud Scots, sometimes insecure North Britons. Their political arrangements also entangled them in a web of government patronage, whose damaging effects on liberty greatly concerned many of Scotland's most intelligent Whig thinkers. We will examine what it was, in the light of Union, to be "Scottish", and why "corruption" so preoccupied the Scots.

IV. POLITE SOCIETY (93 items)

Week 7. Addison and Ramsay: the renovation of culture and society?

(27 items)

Joseph Addison and *The Spectator* enjoyed immediate and lasting success in Scotland. Avidly read and constantly imitated, his masterly essays on sociability shaped the literary renaissance of Watson and Ramsay as well as defining for eighteenth-century Scots normative standards in propriety, reasonableness and taste. We will explore the problems of reviving Scottish literature in a manner that was strongly influenced by English models, and some of the many resonances that Addison's concern for "politeness" struck in Scottish circles.

Week 8. The enlightened metropolis: Edinburgh (24 items)

Edinburgh was the definitive "hotbed of genius" and the self-appointed "Athens of the North", home to a galaxy of academic and literary talent, the traditional focus for Scottish professional life and, by the last quarter of the century, a centre of cultural excellence recognised internationally. This topic will try to discover how the social fabric of Edinburgh life, the physical environment of the Old Town as well as the bold departure of the eighteenth-century New Town, both generated and reflected the patriotic and cultural obsessions of the age.

Week 9. Provincial cultures: Glasgow, Aberdeen and beyond? (26 items)

The role of Glasgow and Aberdeen in eighteenth-century Scotland was both complex and dynamic. On the one hand these towns were home to smaller-scale reflections of Edinburgh developments. On the other, distinctive religious and political traditions, as well as rapidly changing economic structures, made them natural counterweights to Edinburgh, and even focuses for ideas which contrasted starkly with those of the Scottish capital. We will explore the tensions which emerged between Scotland's major towns as the eighteenth century progressed, and consider the case for regarding the Scottish Enlightenment as a truly national phenomenon.

Week 10. Clubs and societies (16 items)

To a degree unimaginable today, eighteenth-century social life for the professional classes revolved around attendance at clubs, societies and other membership-based private institutions, which met in taverns, oyster bars and coffee houses not only in London, Dublin and Philadelphia but in Edinburgh, Glasgow and Aberdeen. Shaped by Addison's journalism, these activities had profound cultural and political significance. We will examine the concerns of those who formed and patronised these organisations, and the role that they played in creating the civic world of the Scottish Enlightenment.

V. PHILOSOPHICAL TRADITIONS (66 items)

Week 1. The great tradition: Hutcheson, Reid, Stewart (25 items)

Before the eighteenth century was over, Scotland's philosophers had acquired an international reputation whose impact may be traced in the university curricula of the nineteenth-century world. Frances Hutcheson, the proponent of the "moral sense", was the philosophical founding father of the Scottish Enlightenment. Later, the "common sense" school of Reid and Stewart, which attempted to counter the dangerous scepticism of David Hume, ensured the dominance of the "Scottish Philosophy". This topic will try to sketch out the cultural roots and the social and political context of these ideas.

David Hume: sceptical empiricism** (14 items)

David Hume was the most important and most original thinker produced by eighteenth-century Scotland. His principal achievement was to undermine faith in a series of prevailing philosophical orthodoxies and to advance the claims of scepticism to be taken seriously. His work, which greatly troubled his Scottish contemporaries, demands our own attention. We shall be especially concerned with his Scottish environment and with his contributions to contemporary Scottish debates.

Week 3. Philosophy of nature: Black and Hutton (27 items)

Following the progress made in economic improvement and philosophical empiricism, the Scottish Enlightenment also claimed to be able to advance human knowledge and understanding of the natural world. The chemist Joseph Black and his friend James Hutton, the first modern geologist, tried to make good this claim. This topic will explore the connections between scientific and other thought in Scotland.

VI. THE SCIENCE OF MAN (72 items)

Week 4. Materialism and commercial society (37 items)

A central achievement of the Scottish Enlightenment was the development, within what Hume called the "Science of Man", of a sophisticated analysis of the historical evolution of society as a reflection of its economic structure. Epitomised by Smith's *Wealth of Nations* and often dependent on conjectural theories of general human progress, the Scottish project was shaped both by commonplace Enlightenment assumptions and by the topical questions arising in a country undergoing rapid commercial and industrial change. Taking as our texts some of the most important works of European economic thought, we will ask why it was that eighteenth-century Scotland produced them.

Week 5. Adam Ferguson: progress and decay (17 items)

Adam Ferguson, now interred in the Priory churchyard in St Andrews, was one of the eighteenth century's most original and most influential thinkers. His singular achievement was to mingle classical Roman political morality with fashionable Enlightenment philosophizing in such a way as to produce a sceptical and thought-provoking analysis of modern society – selfish, deceitful and, in his view, on the road to destruction. This topic will examine how, in developing a critique of the moral basis of commercial society, this Scot managed to establish the new discipline of sociology.

Week 6. William Robertson (18 items)

Robertson was perhaps the age's most popular historian, an international best-seller who combined elegantly philosophical histories with leadership of the Kirk and Principalship of the University of Edinburgh. His studied moderation, his scepticism of previous historical orthodoxies and the extraordinary scope which conjectural methods gave to his narratives make him an example of Enlightenment history at its most distinctive. Again we will examine his works to see how they relate to the condition of eighteenth-century Scots.

VII. LITERARY LIVES (56 items)

Week 7. A society of gentlemen: the Encyclopaedia Britannica and the literati (18 items)

In giving rise to the English-speaking world's best-known compendium of existing knowledge, the Scottish Enlightenment revealed much about its intellectual culture and about its assumption of the value of universal learning to polite, commercial society. More widely, the Encyclopaedia in successive editions provided a focus for the work of many leading Scottish scholars. This topic will also examine the condition and status of the "literati" – Scotland's writers and thinkers – in their own time.

Week 8. Ossian and the novelists: sentiment and sensibility (26 items)

In the translated Gaelic epic poems of Ossian, the Scottish Enlightenment unintentionally provided Napoleon Bonaparte with his favourite reading. However, their ingenious creator, James Macpherson, had also practised on Edinburgh's gullible literati one of the world's most notorious literary confidence tricks. Above all, Ossian tapped into a burgeoning cult of sentiment and sensibility among Scotland's readers and critics, a movement particularly associated with the raging fashion for the novels of Smollett and Mackenzie. We will examine how it was that the literati rashly embraced Macpherson's work, and why Scots from the 1760s onwards became caught up in the taste for literary emotionalism which ultimately gave rise to Romanticism.

Week 9. Sir Walter Scott: history and society (12 items)

The "Great Unknown", the long-anonymous author of *Waverley* and of several other Scottish-based novels which enjoyed sensational literary success in Britain, Europe and North America, was a complex product of the Scottish Enlightenment, both an admiring pupil and a wary critic of its leading figures. In Scott the exploration of Scotland's own identity and historical development reached out to a worldwide audience, in the process shaping an understanding of "Scottishness" - a land of misty mountains, lonely glens and betartaned heroes - which remains extraordinarily prevalent to this day. Our task will be to explain why this happened and how Scotland's experiences in the eighteenth century shaped what were the first genuine historical novels.

VIII: DECLINE AND FALL (23 items)

Week 10: Why did the Scottish enlightenment die? (23 items)

By as early as the 1790s and with growing finality by the 1820s, Scottish commentators expressed the view that their Golden Age was over: the Scottish Enlightenment had fizzled out. Explaining this has remained a major problem for the historian: was Scotland's cultural decline simply about the death of certain key individuals or was there something

more fundamental at work, a changed and hostile environment or the growing influence of new and less conducive ideas and philosophies? We will examine some contemporary testimony, and attempt to answer this question for ourselves.

Week 11: t.b.a.

The Scottish Enlightenment refers to the period of intellectual ferment in Scotland, between roughly the 1740s and 1790s. During this period, Scottish academicians and intellectuals distinguished themselves for numerous breakthroughs philosophy, ethics, history, jurisprudence, sociology, political science and, of course, economics. These questions were foremost on the minds of the Scottish philosophers of the 18th Century. As so many times before, they looked to their French counterparts for answers.

The Scottish Enlightenment (Scots: Scots Enlichtenment, Scottish Gaelic: Soillseachadh na h-Alba) was the period in 18th century Scotland characterised by an outpouring of intellectual and scientific accomplishments. By the eighteenth century, Scotland had a network of parish schools in the Lowlands and five universities. The headquarters and leadership of the Presbyterian Church also remained, as did the universities and the medical establishment. The lawyers and the divines, together with The Scottish Enlightenment began in the mid 18th century and continued for the best part of a century. It marked a paradigm shift from religion into reason. Everything was examined: art, politics, science, medicine and engineering, but it was all begot by philosophy. The Scottish people thought, discovered, discoursed, experimented, wrote, but above all questioned! The Scottish Enlightenment (Scots: Scots Enlichtenment, Scottish Gaelic: Soillseachadh na h-Alba) was the period in 18th- and early-19th-century Scotland characterised by an outpouring of intellectual and scientific accomplishments. By the eighteenth century, Scotland had a network of parish schools in the Lowlands and four universities.
