The First Journal on Genetics, founded in 1908 Molecular Genetics and Genomics (MGG) publishes peer-reviewed articles covering all areas of genetics and genomics. Any approach to the study of genes and genomes is considered, be it experimental, theoretical or synthetic. MGG publishes research on all organisms that is of broad interest to those working in the fields of genetics, genomics, biology, medicine and biotechnology. [show all](#). [hide](#). The Vavilov Institute of General Genetics (VIGG) is the oldest institute of Genetics in the Russian Academy of Sciences [\[more\]](#). Currently, the Institute has 15 laboratories, and 7 research groups. There is also Saint-Petersburg Branch of VIGG including two research laboratories under the direction of Academician S.G. Inge-Vechtomov. A Memorial Museum of the Russian geneticist Nikolay Vavilov has been open at the Institute in 1987 to commemorate his centennial birthday.
