

Capital: Volume One: A Critique of Political Economy

By Karl Marx

Createspace, United States, 2014. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.COMMODITIES. At first sight the wealth of society under the capitalist system presents itself as an immense accumulation of commodities, its unit being a single commodity. But every commodity has a twofold aspect, that of use value and exchange value.² A commodity is first of all, in the language of English Pg 20economists, any thing necessary, useful or pleasant in life, an object of human wants, a means of existence in the broadest sense of the word. This property of commodities to serve as use-values coincides with their natural palpable existence. Wheat e. g. is a distinct use-value differing from the use-values cotton, glass, paper, etc. Use-value has a value only in use and is realized only in the process of consumption. The same use-value may be utilized in various ways. But the extent of its possible applications is circumscribed by its distinct properties. Furthermore, it is thus limited not only qualitatively but also quantitatively. According to their natural properties the various use-values have different measures, such as a bushel of wheat, a quire of paper, a yard...

This book is one of the most ambiguous books ever written, mired in confusion, contradiction, and ultimately mysticism. There's about as much economics in this book as there is in the Dao Di Jing. Its ultimate virtue, however, is that Marx unwittingly puts to sleep the labor theory of value, first put forth by Adam Smith. Furthermore, this book is responsible for the murder and starvation of millions, as capital accumulation and the division of labor must necessarily disintegrate without private ownership over the means of production. Capital is heterogeneous, and complementary, and as such, requires disseminated ownership and a dynamic process of trial and error on the part of the capitalists, along with a functional price mechanism coordinating production.
