Although the book could be organized by methodology or by media type, it was instead organized by theoretical area. The fundamental processes of seeing were grouped into 12 theoretical areas (as conceived and explained in the introductory chapter). It also serves as a methodological handbook, of sorts, for visual communication researchers. For the media practitioner, it aids in the understanding of how audiences use media, and it can contribute to more effective use of each specific medium. Much of the work in this volume is an outgrowth of a number of organizations. The conference served as a focal point for nurturing the development of visual communication theory and research through the richness of interdisciplinary perspectives. Play as a medium for learning and development: A handbook of theory and practice. B Sutton-Smith. The future of play theory: A multidisciplinary inquiry into the contributions of Brian Sutton-Smith.
