Disenfranchised grief occurs when the relationship of the person with the deceased is not socially sanctioned, cannot be openly shared, or seems to be of lesser significance. A patient states, "I have been depressed since the death of my ex-husband." What type of grief does the nurse anticipate that the patient is experiencing? 1 Normal grief 2 Anticipatory grief 3 Complicated grief 4 Disenfranchised grief.

4. The nurse is caring for a child diagnosed with muscular dystrophy. The parent of the patient feels severe grief and loss after seeing the child suffering. Which type of grief is the parent experiencing? 1 Normal 2 Anticipatory 3 Complicated 4 Disenfranchised grief.

2. The Kübler-Ross model, or the five stages of grief, postulates a series of emotions experienced by terminally ill patients prior to death, or people who have lost a loved one, wherein the five stages are: denial, anger, bargaining, depression and acceptance. Although commonly referenced in popular media, the existence of these stages has not been demonstrated and the model is not considered helpful in explaining the grieving process. Young man sitting on the sofa covering his face with hands, feeling hopeless, depressed or crying, visiting psychotherapist, finding out bad diagnosis or medical test results. Couple During Grief Emotional so hurt when divorce couple holding broken heart and Life still affected by grief. Unhappy relationship hurt feeling for lover. When my mother died in a local nursing home, my "career" of visiting this exceptional facility nearly every day for close to 15 years ended. Mom's death prompted a nurse to whom I'd become quite close, to say to me, "We'll still be seeing you up here. You won't be able to quit.". She was wrong on that one. However, my case may be a little different from many others, as I'd spent nearly two decades caring for multiple elders. Also, my caregiving had not totally ended. I still had a family member at home who needed my care. Grief and Relief. Many of u
