A GIS database of geologic units and structural features in California, with lithology, age, data structure, and format written and arranged just like the other states. View. Show in a web browser window: [Legend for lithology colors]. Show in Google Earth or other KML viewer: cageol.kml (Uncompressed, 50.2M). cageol.kmz (Compressed, 14.0M). Each of California's regions is defined by the major geology facts and features within that region. Some of the features of the California landscape formed as the result of tectonic processes that took place deep beneath the surface. Wind, water, ice, and other agents of erosion at die surface carved other features of the landscape and maps. Geologic Processes Inside Earth California's scenic mountains attract visitors from around the world.
