Earth's Dynamic Systems, Ninth Edition uses the hydrologic system and the tectonic system as the foundation to help build an understanding of physical geology. Customer reviews. 3.7 out of 5 stars. I've given this a 1 star rating due to the ridiculous price. This is a great book if you manage to get hold of it, but paying £120+ for a new copy is just plain silly. A great alternative, which is newly published and half the cost is, Earth: Portrait of a Planet. ISBN-10: 0393111377 ISBN-13: 978-0393111378. Another alternative is to buy the 9th edition of this book second hand, you can pick it up for around \$12.50 USD, just pay the P&P and you be a lot better off then shredding out £130 for a new copy of this text book.
