DEVELOPMENT I: November 2015-February 2016

Instructors: Sarah Birss, MD
Bayard Clarkson, MD

Class Dates : November 12 and 19, 2015
December 3, 10, 17
Academic Lecture January 7, 2016
January 21 and 28
February 4

From its very beginnings, psychoanalysis has been concerned with the experience of the infant. In this short eight-week course we hope to cover three important areas; the historical evolution of psychoanalytic conceptions of infancy, contemporary research on infant cognition and attachment, and how this all relates to a developmental view of psychopathology.

We have decided to focus on the following book as a text for the class:

Bringing Up Baby: the Psychoanalytic Infant Comes of Age by Dianna T. Kenny (Karnac Books, 2013)

We will read most of the book. We suggest that you purchase a copy. It can be purchased on Amazon, Barnes and Noble, or directly from Karnac Books. The BPSI library will have a copy of the book.

This book is a wonderful summary both of the development of psychoanalytic ideas about infants, and of contemporary views of infancy including child development research and developmental neuroscience.

We will pair the chapter readings with some original source material, and make comparisons with contemporary developmental theory. In layers throughout the course, we will be introducing you to a relational view of development that is rooted in dynamic systems theory. Periodically, we will try to illustrate the concepts we are discussing with some videotape vignettes of a mother-baby dyad, and with case material.

We will usually be assigning only two readings per class, and we hope you will find them readable and suitable for discussion. Because there is so much material to cover and so many wonderful papers, we have also suggested recommended readings.

Class I: Introduction to Infant and Early Childhood Development

November 12, 2015

Learning Objective: To examine the place of infancy in the developmental lifespan including biological, social and theoretical constructs.

Readings:

1. Kenny, Dianna (2013) Bringing Up Baby: The Psychoanalytic Infant Comes of Age, Karnac Books, London. Chapter One: *Psychoanalysis and Infancy*. Especially pages 7-15 and 20-26. [Available in the [Library](#)]
2. Lyons-Ruth, K., (2000), "*I Sense that You Sense that I Sense...*": Sander's Recognition Process and the Specificity of Relational Moves in the Psychotherapeutic Setting. *Infant Mental Health Journal*, 21 (1-2), 85-98. [Available in the [Library](#)]

Class II: Freud's Infant and Contemporary Developmental Theory

November 19, 2013

Learning Objective: To become familiar with the concept of dynamic systems theory and with how it differs from stage theories of development.

Readings:

1. Kenny, Dianna (2013) Bringing Up Baby: The Psychoanalytic Infant Comes of Age, Karnac Books, London. Chapter Two: *Freud's theory of infantile sexuality*, pp. 27-37, and pp. 56-77. [Available in the [Library](#)]
2. Demos, Virginia, (2007) The Dynamics of Development, Chapter 6 in Piers, C., Muller, J., and Brent, J. Self Organizing Complexity in Psychological Systems, Jason Aronson, Lanham, Md. [Available in the [Library](#)]

Class III: Infant of the Early Child Psychoanalysts

December 3, 2015

Learning Objective: To compare and contrast the views of infancy held by the early psychoanalysts through Winnicott.

Readings:

1. Dianna (2013) Bringing Up Baby: The Psychoanalytic Infant Comes of Age, Karnac Books, London. Chapter Three: *The infant of the child psychoanalysts.*, pp. 79-141. [Available in the [Library](#)]
2. Winnicott, D.W. (1971). Playing and Reality, Chapter 9: *The Mirror Role of Mother and Family in Child Development*, London and New York: Tavistock Publications. [PEP Web Link](#)

Recommended:
