To set a reading intention, click through to any list item, and look for the panel on the left hand side Post-wall Critical Reconstruction in Berlin was closely associated with an architectural approach called "New Simplicity," theorized by Vittorio Magnago Lampugnani and championed by architect Hans Kollhoff. Hans Stimmann also used Critical Reconstruction as the basis for his Planwerk Innenstadt, an inner-city development plan for Berlin that favored the demolition of mid-century buildings and the infill of empty plots with higher-density, mixed-use structures. Major examples of Critical Reconstruction in Berlin include Potsdamer Platz, the Friedrichstadt Passagen, and Alexanderplatz....

The right to the city The Blackwell city reader.
New sites and spaces gradually became part of the 2000s place marketing imagery and narrative, as urban leaders sought to promote the "creative city"™. By combining urban political economy and cultural approaches from the disciplines of urban politics, geography, sociology and planning, the book contributes to a better understanding of the interplay between the symbolic "politics of representation"™ through place marketing and the politics of urban development and place making in contemporary urban governance.
