This handbook covers topics that are essential for quality management of a public health or clinical laboratory. They are based on both ISO 15189 and CLSI GP26-A3 documents. Laboratory quality can be defined as accuracy, reliability and timeliness of reported test results. The laboratory results must be as accurate as possible, all aspects of the laboratory operations must be reliable, and reporting must be timely in order to be useful in a clinical or public health setting.

3 Laboratory test specimens.

3.1 A Football Turf is defined as the synthetic surface and infill, any shockpad and all supporting layers that influence the sports performance or biomechanical response of the surface.

3.2 Tests shall be made on all elements of the construction that influence the sports performance or biomechanical response of the surface.
