Laryngeal cancer refers to cancer of the larynx, or voice box. It is the second most common cancer of the head and neck after mouth cancer. Because the voice box, and parts of the body near the voice box, are so important to breathing, speaking and eating, the cancer itself and the treatment used can greatly influence quality of life. Most cancers of the larynx are found after there a patient has hoarseness that doesn't go away or difficulty with breathing or swallowing. [Back to top](#). [Contents](#).
