Lectures in Abstract Algebra, 1. Basic Concepts, 2. Linear Algebra, 3. Theory of Fields and Galois Theory. New York: D. Van Nostrand Company. has been cited by the following article: TITLE: Algebraic Structures of Mathematical Foundations. AUTHORS: Robert Murray Jones. ABSTRACT: In this paper we undertake to examine how algebra, its tools and its methods, can be used to formulate the mathematics used in applications. We give particular attention to the mathematics used in application to physics. We suggest that methods first proposed by Henry Siggins Leonard are well suited to such an examination.
