II. The International Dimension of Taxation. In the development of a country's tax laws, the international dimension plays an increasingly important role that significantly restricts the rules that might be adopted if regard were had only to domestic considerations. The increasing role of international factors is mainly attributable to the globalization of the world economy. A. Importance of International Taxation.

Tanzi explores how foreign taxes on repatriated income should be treated; how profits, sales, and ownership of property should be allocated among countries; and to what degree various taxes should be coordinated. As global markets for goods, services and financial assets have become increasingly integrated, national governments no longer have as much control over economic markets. With the completion of the Uruguay Round of the GATT talks, the world economy has entered a fresh phase requiring different rules and different levels of international cooperation.
