The Extended Industry Standard Architecture (in practice almost always shortened to EISA and frequently pronounced "eee-suh") is a bus standard for IBM PC compatible computers. It was announced in September 1988 by a consortium of PC clone vendors (the "Gang of Nine") as a counter to IBM's use of its proprietary Micro Channel architecture (MCA) in its PS/2 series. Inside the EISA computers by Tony Dowden, 1990, Addison-Wesley edition, in English. Are you sure you want to remove Inside the EISA computers from your list? Inside the EISA computers. by Tony Dowden. Published 1990 by Addison-Wesley in Reading, Mass . EISA is the unique association of 55 special interest magazines from 29 countries. Internationally known for the European EISA Awards, EISA started in 1982 when the editors-in-chief from five European photo magazines came together to select "The Camera of the Year" for the first time. They had no idea that out of this meeting EISA - the European Imaging and Sound Association - would emerge some years later. This historic moment took place in 1989 after another 10 photo magazines had joined the group in the meanwhile. '82. '85. '89. Later on another two panels were developed ins...
