WOMEN AND WRITING: A THOUSAND YEARS

Starting with the Will of Ethelgifu around 990, we present a thousand years of writing by, for, or about women. Such a long period has to be selective, and many obvious names are not included. There is no Jane Austen, for example. There are no living women, and the most recent writers are Elizabeth Bishop (1911-79), the only one born in the 20th century, and Caroline Gordon (1895-1981).

The 22 cases are mainly arranged in chronological progression, with some incursions for special topics. The early cases show 15th century printings of medieval women's works, and also manuscript books commissioned by women, often with portraits of their original owners. There is a case of land grants to and from medieval women; it seemed more acceptable for women to own land in the 13th century than in Victorian England. Literary women abound in every century, and are grouped into English (6 cases), and American Literature (3 cases) and American History (2 cases). Most of the material is in the English language, but some of the earlier items are in Latin. There is a special case for Continental Women, writing in French, German, Italian and Russian, or translated from Spanish. The Religion case jumps from the fabled Italian Pope Joan to the American Mary Baker Eddy; the Home and Family case covers nursery and kitchen, while printers and binders can be seen in another case. Forceful women include a Russian woman cavalry officer who fought against Napoleon, as well as a woman soldier who helped win the Revolutionary War. Women publishers of famous men are represented by Sylvia Beach and Dora Marsden. Some fictional items are included, such as Ovid's letters from wives of classical heroes and Queen Victoria's diary in Jamaica. On the walls are some prints of women artists and writers, supplied by Graphic Arts.

I am grateful to many people for their suggestions, particularly to Professor Natalie Davis of the History Department, and to Professor Tom Roche of the English Department.
