Let us know what's wrong with this preview of The Splendor of Iridescence by Hilda Simon. Problem: It's the wrong book It's the wrong edition Other. Details (if other): Cancel. Thanks for telling us about the problem. Return to Book Page. In living creatures, structural coloration is the production of colour by microscopically structured surfaces fine enough to interfere with visible light, sometimes in combination with pigments. For example, peacock tail feathers are pigmented brown, but their microscopic structure makes them also reflect blue, turquoise, and green light, and they are often iridescent.

Animal coloration; Biological photonic structures; Biological structural color; Bio-optics; Bio-photonics Intense and bright colors result from the interaction of light with periodic micro- and nanostructures. Structural colors in the animal kingdom have attracted increasing research interest in recent years. Biological organisms offer an enormous variety of periodic micro- and nanostructures that by specific interaction with light provide distinct coloration. This sometimes dynamic reflectivity is... Parker, A.R., McPhedran, R.C., McKenzie, D.R., Botten, L.C., Nicorovici, N.P.: Aphrodites iridescence. Part One: The anatomy of structural colors -- The ABC of light and color -- A history of color -- The blue birds -- The mechanics of iridescence -- Part Two: The beauty of iridescence -- Iridescent colors in the animal world -- The bird of Juno: the Peacock -- The bird of Quetzalcoatl: the Quetzal -- Flying jewels: Hummingbirds -- The nectareaters: Sunbirds -- The Madagascan marvel: Urania moths -- The blue butterflies: Morphoes -- The gold bugs: Iridescent beetles.

which animals produce color: through pigments, structural colors or bioluminescence. 2. Fig. 2 Structural colorations in nature. (a) Base of *H. trionum* petal, showing iridescence overlying the red pigment, shown in the inset; 16. (b) blue iridescence is prevalent in the fern-like tropical understory plants of the genus *Selaginella*; 17. *Structural Colors in the Animal World*. by Simon, H. Hardback £8.00. *Animal Communities in Temperate America*. As illustrated in the Chicago Region, Shelford, V.E. Price £10.00.
