

problem-orientated clinical microbiology and infection

SECOND EDITION

Hilary Humphreys
William L. Irving

Contents

N.B. Throughout the book undergraduate material is presented in blue; postgraduate material in red. **UG** indicates cases which contain predominantly undergraduate material (but may also contain postgraduate material). **PG** indicates cases which are primarily aimed at postgraduates (but also contain material which will be useful to undergraduates). See 'How to use this book' on p. *xv* for more information.

How to use this book *xv*

List of abbreviations *xvii*

SECTION 1

Skin and mucous membranes 1

- UG Case 1** Howard, a 10-year-old boy with scaly skin lesions 3
- UG Case 2** Hannah, a 67-year-old widow with a leg ulcer 6
- UG Case 3** Victoria, 4 years old, with painful mouth ulcers 10
- UG Case 4** Albert, 4 years old, with painful mouth and sore throat 14
- UG Case 5** Jamie, a 5-year-old with a troublesome graze 18
- UG Case 6** Simon, 4 years old, develops a rash 23
- UG Case 7** Hayley, 8 years old, develops a rash 27
- UG Case 8** Steven, a 42-year-old accountant with a red, painful eye 32
- UG Case 9** Extensive rash, headache, fever, and myalgia in Avril, a 20-year-old woman 36
- UG Case 10** Mr Emmerson, Ms Lake, and Mr Palmer, all aged 30, with blisters 40
- UG Case 11** Skin rash and arthralgia in Jane, a 25-year-old woman 43
- PG Case 12** Father Pat, a 45-year-old priest with a skin rash 45

Self-assessment 47

SECTION 2

Respiratory tract 51

- UG Case 13** Darren, a hot and irritable 12-month-old infant 53
- UG Case 14** Susan, a 21-year-old with a runny nose and imminent exams 57
- UG Case 15** Peter, a 19-year-old student with a sore throat 60
- UG Case 16** Respiratory distress and fever in Catriona, a 1-year-old infant 65
- UG Case 17** Mrs Carter, 32 years old, with a cough and generalized muscle aches and pains 68
- UG Case 18** Sarah, a 55-year-old woman with rigors, cough, and chest pain 75
- UG Case 19** Dermot, a 57-year-old smoker with increasing dyspnoea and confusion 79
- UG Case 20** Dyspnoea, wheeze, and a productive cough in Charlie, a 55-year-old smoker 83
- UG Case 21** Shula, 5 months old, off colour, and feeding poorly 86
- UG Case 22** Productive cough in Benjamin, a 14-year-old with cystic fibrosis 90

Self-assessment 94

SECTION 3

Gastrointestinal system 97

- UG Case 23** Bertrand, a 35-year-old Frenchman with nausea, abdominal pain, and diarrhoea 99
- UG Case 24** Damian, a 13-month-old baby with vomiting and diarrhoea 104

- UG Case 25** Fraser, a 37-year-old business executive with abdominal pain, diarrhoea, and flatulence 108
- UG Case 26** Bob, a 55-year-old retired coal miner with abdominal pain 112
- UG Case 27** Belinda, a 25-year-old non-Caucasian with malaise, myalgia, and fever 117
- UG Case 28** Anorexia, malaise, and nausea in Eddie, 25 years old 121
- UG Case 29** Tim, a 43-year-old business manager, is keen to donate blood 130
- PG Case 30** Upper abdominal pain in Gareth, a 46-year-old sheep farmer 135
- PG Case 31** Continuous non-bloody diarrhoea in Paul, a 35-year-old aid worker 138
- PG Case 32** Winston, 68 years old, with nausea and vomiting 140
- UG Case 33** Maria's diarrhoea after discharge to nursing home 142

Self-assessment 145

SECTION 4

Genitourinary system 149

- UG Case 34** Gillian, a 23-year-old receptionist with frequency, dysuria, and haematuria 151
- PG/UG Case 35** Joan's cloudy bag 155
- UG Case 36** Elizabeth, a 28-year-old prostitute, attends the clinic for a check-up 159
- UG Case 37** Sharon, a 24-year-old personnel manager with a blistering genital rash 164
- UG Case 38** Jane, 27 years old, requests an AIDS test 168
- PG Case 39** Suprapubic pain and haematuria in Gavin, a 35-year-old sales executive 173
- UG Case 40** Mark, a 42-year-old solicitor, has a lump on his penis 176

Self-assessment 179

SECTION 5

Central nervous system 181

- UG Case 41** Nigel, a 3-year-old boy with lethargy and a skin rash 183
- UG Case 42** Mr Aldridge, a 45-year-old accountant with odd behaviour and a fever 189
- UG Case 43** Jim, a 72-year-old man with progressive headache 194
- UG Case 44** John, a 75-year-old man with muscle weakness 198
- PG Case 45** Andrew, a 20-year-old student with fever, nausea, and headache 201
- PG Case 46** Mr Grundy, a 62-year-old histopathology biomedical scientist who has become forgetful and disorientated 205

Self-assessment 210

SECTION 6

Systemic infections 213

- UG Case 47** Mary, a 35-year-old engineer with nausea, weakness, and rigors 215
- UG Case 48** Bill, a 65-year-old man with vomiting, abdominal pain, and fever 220
- UG Case 49** Eric, a pyrexial 76-year-old surveyor with a heart murmur 226
- UG Case 50** Margaret returns from Africa with a fever and headache 232
- UG Case 51** Thomas, a 35-year-old teacher who is anti-HIV-positive 237
- UG Case 52** Karim, a 65-year-old cachectic man with fever 245
- PG Case 53** Gordon, a 35-year-old Scottish vet with fever 252
- UG Case 54** Complications of a road traffic accident in Brian, a retired 63-year-old barrister 258
- PG Case 55** Fever, sweating, and weight loss in George, recently returned from East Africa 264
- PG Case 56** Dilip, a 45-year-old motor mechanic with diabetes and renal failure 268

UG Case 57 Dr Wooley suffers a needlestick injury 273

Self-assessment 277

SECTION 7

Pregnancy and the neonate 281

PG Case 58 Irritability, feeding difficulties, and hypoxia in Sarah just after birth 283

UG Case 59 Deborah, 23 years old and 12 weeks pregnant, develops a rash 287

UG Case 60 Kate, a 23-year-old pregnant physiotherapist 291

PG Case 61 A sticky eye in Daniel, 5 days old 295

PG Case 62 Lily, 12 weeks pregnant, whose son has developed chickenpox 297

PG Case 63 Mrs Fisher, 25 years old, pregnant, and with a history of genital herpes 301

PG Case 64 An unexpected blood count from Mrs Archer, 16 weeks pregnant 304

Self-assessment 309

SECTION 8

Miscellaneous 313

UG Case 65 David, a 22-year-old student with a swollen testis 315

PG Case 66 Lenny, a 38-year-old Jamaican with a palpable skin rash 318

PG Case 67 Richard, a young man with lethargy and breathlessness 321

PG Case 68 Michael, a law student recently returned from Africa with a fever 324

PG Case 69 Polyarthralgia in Susan, a 25-year-old 327

PG Case 70 Problems on Friday afternoon for a junior house officer 330

Self-assessment 333

Appendices 335

1 Rational use of the microbiological laboratory 337

2 Immunization against infectious diseases (UK recommendations) 340

3 Some of the more commonly used antimicrobial agents 345

4 Notifiable diseases (United Kingdom) 353

Outline of the subject matter of each case 355

Answers to self-assessment 361

Clinical Microbiology Reviews. Clinical and Vaccine Immunology. EcoSal Plus. Eukaryotic Cell. Infection and Immunity. Journal of Bacteriology. Journal of Clinical Microbiology. Journal of Microbiology & Biology Education. Journal of Virology. mBio. Microbiology and Molecular Biology Reviews. Computer decision support systems can solve this problem by automatically identifying potential opportunities to optimize therapy, using real-time analysis of data from several sources (e.g., pharmacy, electronic medical record, and laboratory) (11). Infection control committee participation. It is paramount that the clinical microbiologist participates on the infection prevention/control committee and acts as a consultant to infection preventionists. Problem-oriented clinical microbiology and infection is an excellent book for consolidating one's microbiology knowledge. While it is not a dedicated stand alone text, it helps with the understanding of microbiology tremendously when combined with class lecture notes or a proper textbook. Good images are included throughout the book and cases are divided into undergrad/postgrad headings to suit the reader's level. Prof. Humphreys teaches at the Royal College of Surgeons in Ireland and this book follows the RCSI microbiology course very well. Read more. 2 people found this helpful. Advanced Clinical Experience.
