Article (PDF Available) May 2012 with 23,431 Reads. How we measure 'reads'. In the section on General Principles, introduction to drug policy is a useful topic. A brief historical perspective. A standardized score-card validated by a physician and a clinical pharmacologist was used in the survey. Three sections with 11 questions each were included evaluating the pharmacist's behavior, expertise and willingness-to-report an adverse drug event (ADR). Results: The results show that the majority of pharmacists did not reacted according to the accepted guidelines.
